LED Tail and Brake Lights for Older Mogs

Can the folks behind you tell when you have applied the brakes? With the older Morgans, and especially on a sunny day, the answer may well be NO. Now an Oregon company has developed replacement lights using LEDs. These replace-

ment lights are much brighter than the standard bulbs. The replacement lights were on display at the VanDusen ABFM and one of our members (Graham Bailey) talked with the fellow about the possibility of a discount for a group order. As I understand it, the price would be US\$118 per set, plus shipping, for an order of 15 sets.

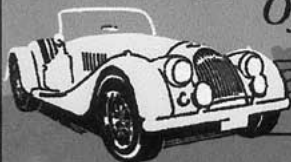

I have spoken with the producer and he could produce the required number of sets and have them at the Bellevue ABFM on July 25th. He does need to know how many sets would be positive ground and how many negative ground. If you are interested and would like to avoid the complexities of currency conversion, shipping, etc. contact Steve at Classic Auto LEDs by email at steve@classicautoleds.com or by phone at 541-619-8335.

You can visit Steve's web site to see how the lights are constructed. There is no member of MOGNW coordinating a group purchase, so you will all have to work with Steve independently. If enough of you place provisional orders early enough, Steve will be able to respond in time for Bellevue. The proposed group order price is a substantial discount from list.
